AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A pressure-sensitive adhesive sheet comprising a composite film comprised by a composition containing a urethane polymer and a vinyl polymer as effective components, a first film comprising a material different from that of the composite film, the first film laminated on one side of the composite film, and a pressure-sensitive adhesive layer formed on the other ~~said~~ side of the composite film, wherein the pressure-sensitive adhesive sheet has a modulus of 9 N/mm^2 or more and 250 N/mm^2 or less when an oblong piece of the pressure-sensitive adhesive sheet with a width of 20 mm is bent at a radius of curvature of 3.0 mm.

2. (original): The pressure-sensitive adhesive sheet as claimed in claim 1, wherein the pressure-sensitive adhesive sheet has a modulus of 15 N/mm^2 or more and 250 N/mm^2 or less when an oblong piece of the pressure-sensitive adhesive sheet with a width of 20 mm is bent at a radius of curvature of 3.0 mm.

3. (original): The pressure-sensitive adhesive sheet as claimed in claim 1, wherein the vinyl polymer is an acrylic polymer.

4. (previously presented): The pressure-sensitive adhesive sheet as claimed in claim 1, wherein the composite film comprises a film obtained by reacting a polyol and a polyisocyanate in a radical polymerizable monomer to form a urethane polymer, coating a mixture of the urethane polymer and the radical polymerizable monomer on the first film and irradiating a radiation onto the coating to cure it.

5. (original): The pressure-sensitive adhesive sheet as claimed in claim 4, wherein the radical polymerizable monomer is an acrylic monomer.

6. (original): The pressure-sensitive adhesive sheet as claimed in claim 1, wherein the composite film has a storage modulus at 25°C of less than 2.0×10^8 Pa and a storage modulus at 100°C of 3.0×10^5 Pa or more.

7. (original): pressure-sensitive adhesive sheet as claimed in claim 6, wherein the first film has a storage modulus at 25°C of 2.0×10^8 Pa or more.

8. (original): The pressure-sensitive adhesive sheet as claimed in claim 7, wherein the first film has a thickness (t1) of 10 μm or more and 200 μm or less and the composite film has a thickness (t2) of 10 μm or more and 300 μm or less, and wherein a ratio of the thicknesses (t1/t2) is t1/t2 = 0.1 to 10.

9. (canceled).

10. (original): The pressure-sensitive adhesive sheet as claimed in claim 1, wherein the first film has a thickness (t1) of 10 μm or more and 200 μm or less and the composite film has a thickness (t2) of 10 μm or more and 300 μm or less, and wherein a ratio of the thicknesses (t1/t2) is t1/t2 = 0.1 to 10.

11.-19. (cancelled).
